ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

The irrigation reservoir and wetlands on this property are on a wetland drainage that terminates in a pond that is located on uplands. The pond does not overflow into a jurisdictional tributary or other waters of the U.S. The irrigation reservoir and wetlands on this property are neither adjacent to nor surface connected to a waters of the U.S. The Signal Ditch is constructed entirely on dry land. Since the ditch does not intercept 100% of the flows of a natural tributary, it has not replaced a natural tributary and is simply functioning as an irrigation ditch.
